Program description

FontSort is a sharewareprogram. You have to <u>register</u>.
FontSorter sorts all your Fonts in order of similarity.So you can remove similar looking fonts from your system.
<u>Inhalt</u>

Registrierung

If you are registered you can use every update from choice inthe next 2 years.

To register means to pay for the shareware you have tested.
After registring you can use the software as long as you want to.
The registration fee is a small amount of money to make me write newprograms or make the old ones better.

Use the registrationform fontsort.txt.
(Press "Register" on the to of the window).
Contents

Operation of program

First all available fonts are read from the system (this can take a little time).
You can display 60%-100% equal fonts to find dupes.
Printing always prints the fonts aktual displayed in the window.
