

The *ViewMaster* Authoring Tool

You have data, we have technology !

The **ViewMaster** electronic book viewer is but the tip of an iceberg, only a smaller part of an integral technology developed for electronic publications production. A larger part of this technology is made up of tools to process, maintain and interlink data.

If you are interested in employing the **ViewMaster** technology for your own electronic book publications (catalogues, company materials, teaching texts, encyclopedias, manuals, textual databases, etc.), please contact directly:

Agentura Modre stranky
