

xtend your power and seize control!

Welcome to Extension Overload 4.0! Extension Overload 4.0 is your all round extension & control panel management solution. It offers information on all the extensions in your system. It also lets you activate and deactivate them, so that you can always easily tailor your system to your current requirements. In addition, Extension Overload includes a useful collection of helpful information and tidbits.

Extension Overload Features

- * Allows you to enable and disable your extensions and control panels on the fly without going to the Extensions or Control Panels folders.
- * Provides detailed descriptions of over 1400 extensions and control panels, from Apple and many other companies.
- * Covers extensions and control panels from System 7, 7.5, 7.6, Mac OS 8, 8.1, 8.5, 8.6, iMac and G3.
- * Searching for a particular extension or control panel within the database can be done either by name or description.
- * Generates reports to keep track of your extensions and control panels.
- * Simple Internet Version Control that will tell you when a new version of Extension Overload has been released, and then gives you an option to easily download it at the click of a button.
- * A Tidbits menu that contains interesting tidbits of information including:
 - What is an extension?
 - What is a shared library?
 - Tips to speed up your Macintosh.
 - System error codes to help make your troubleshooting process easier and faster.
 - Easter eggs (little gimmicks hidden somewhere in the software).
 - A guide on how to get software updates.
