Member of the ASP

This program is produced by a member of the Association of Shareware Professionals (ASP). ASP wants to make sure that the shareware principle works for you. If you are unable to resolve a shareware-related problem with an ASP member by contacting the member directly, ASP may be able to help. The ASP Ombudsman can help you resolve a dispute or problem with an ASP member, but does not provide technical support for members' products. Please write to the ASP Ombudsman at 545 Grover Road, Muskegon, MI 49442-9427 USA, FAX 616-788-2765 or send a CompuServe message via CompuServe Mail to ASP Ombudsman 70007,3536.

Frequently Asked Questions

What are the benefits of registering?

Once you have registered you will receive a registration code (by e-mail or postal mail) which eliminates this reminder screen and all time-limiting features. Additionally, you will get free support by e-mail and phone, free minor version updates, and discounts on other VulcanSoft products.

I would like to register by e-mail, but I am concerned that my credit card number might be stolen on the Internet. What are you doing to protect me from that?

We have taken extensive steps to encrypt (scramble) your registration information sent via e-mail making it virtually impossible for third parties to use your information even in case your e-mail was intercepted.

Do I need to register 2 copies if I use this software on 2 computers?

If you are the only person using this software and it is not being used on two PC's at the same time then you only need to register one copy. Any other scenario requires you to register one copy per user.

Will any of my information be sold and/or given to third parties?

No. It is our strict policy not to sell or otherwise give any of our customers' information to third parties!

If I don't give my e-mail address how will I get my registration code?

You will receive your registration code by postal mail. Please note that mail to destinations outside North America can easily take 7 to 10 business days.

Will I get notices of updates by postal mail?

No. All notifications of updates and new products will be sent via e-mail only. You can, however, always find the latest versions and/or new products on our web site.

Can I give a copy of a registered version to a friend?

You can give a copy of the software to a friend, but the registration code is for your eyes only. See Legal Notices in the help file.

How do I know if I have the latest version?

You can be sure to always find the latest versions on our web site at <http://www.vulcansoft.com>. The general rule is that if this version's date/time stamp is older than 6 months you can get a newer version at above address. You can also find the latest VulcanSoft products on CompuServe (GO WINUSER) and on America Online's Software Center.

Are there any other VulcanSoft products on the market?

Yes, there are. Again, please visit our web site for the latest list of VulcanSoft products.

Why are you not charging sales tax from Colorado residents?

Since only a small percentage of our customers are Colorado residents we decided not to confuse all other customers (including international customers). Instead, we

take care of the appropriate sales tax internally.

Please feel free to contact us at info@vulcansoft.com if you have additional questions.

How to Register (Purchase)

What are the benefits of registering?

You will receive a registration code which eliminates the "reminder screen" and all time-limiting features. Additionally, you will get free minor version upgrades, free [support](#), free notifications via e-mail of updates and new products, and substantial discounts on future (major) versions of this and other VulcanSoft products.

How do I register?

The easiest way to register is through the included Registration Guide built into the program (which you will see every time you start an unregistered copy of this program or by selecting **Register** and **Registration Guide** from the main menu). This module guides you through the registration process and calculates the registration fee for single copies, site-licenses and applicable discounts.

Accepted forms of payment are:

- Visa, Mastercard and American Express
- Check or Money Order (**must be in US-Dollars**)
- Sorry, no purchase orders!

Alternatively, you can also register online on our web site at <http://www.vulcansoft.com>

All orders are guaranteed to be processed within 24 hours of receipt. Please note that postal mail may easily take 7-10 business days if mailed from outside North America. Also, if you do not provide your e-mail address we will send your registration information to you by postal mail.

Guide to the Main Screen

Vulcan CityDistance 97 calculates the distance between cities via their respective longitude and latitude. The results are straight-line distances, not driving distances! The current datafile includes over 1,600 U.S. cities (all with 20,000+ inhabitants) and over 200 international cities.

Click on the area of interest below:

The screenshot shows the 'Vulcan CityDistance 97' application window. The title bar is red with the application name and standard window controls. Below the title bar is a menu bar with 'File', 'Edit', 'Setup', and 'Help'. A search box on the left contains 'Berlin'. A list of cities is displayed below the search box, with 'Berlin, Germany' selected. To the right, there are three tabs: 'Kilometers', 'Miles', and 'Nautical Miles'. The 'Miles' tab is active. A table displays the distances between the selected city and other cities in the list.

	Berlin	Boulder	Lisbon	Los Angeles
Berlin		8,176	2,316	
Boulder	8,176		7,842	
Lisbon	2,316	7,842		
London	925	7,559	1,595	
Los Angeles	9,338	1,340	9,167

Select the desired tab to have the distances calculated in Kilometers, Miles, or Nautical Miles.

Click on a city to select or de-select it for calculations. You can also use the spacebar instead of the mouse.

Click on the cell in the upper-left corner to select or de-select the entire table.

Click on one of these cells to select an entire row in the table. You can also drag the mouse to select multiple rows.

Click on one of these cells to select an entire column. You can also drag the mouse to select multiple columns.

These are the calculated results in Kilometers, Miles, or Nautical Miles (based on the selected tab). To find the distance between two cities simply find the crossing cell of one city's column and another city's row.

Type the first few characters of a city to locate the city you are looking for.
