

SMTP - General Tab

Displays information about a simple mail transfer protocol (SMTP) recipient.

Display Name

Shows the name that appears in the Address Book.

E-mail Address

Displays the recipient's Internet address.

Always Send To This Recipient In Microsoft Exchange Rich-text Format

Retains the rich text format when sending the message.

To/Cc/Bcc

If you are composing a message, adds the name to the corresponding address box in the message.

Send Options

Displays the **Send Options For This Recipient Properties** dialog box, where you can specify the Internet encoding method you want to use on a per-recipient basis. For example, if you have the default for encoding set to Multipurpose Internet Mail Extensions (MIME) and you have one recipient whose e-mail system uses only uuencode, you can specify that this user receive all messages encoded in uuencode rather than MIME.

Note You must add the recipient to your personal address book (PAB) before you can specify special encoding instructions.

Internet Tab

Specifies format options for an attachment.

Attachment Format

Don't Know

Select this option if you don't know the attachment format.

MIME

Select this option if you want the attachment to be in MIME format.

UUEncode

Select this option if you want the attachment to be in uuencode format.

BINHEX

Select this option if you want the attachment to be in uuencode format and/or BinHex format for Macintosh files.
