

Information for Serif DrawPlus 2.0 CD-ROM Users

Using Write to View This Document

To make this document easier to read, you can enlarge the Write window to its maximum size. To do so, click the Maximize button in the upper-right corner of the window. Or open the Control menu in the upper-left corner of the Write window (press `ALT+SPACEBAR`), and then choose the Maximize command.

To move through the document, press `PAGE UP` or `PAGE DOWN`. Or click the arrows at the top and bottom of the scroll bar along the right side of the Write window.

To print the document, choose Print from the File menu.

For Help on using Write, press `F1`.

 - 2.2 Using the Electronic category catalogs**
 - 2.3 Is your CD-ROM drive installed as drive 'D' ?**
- 3.0 Useful Tips on Using Serif Mega FontPack fonts**

1.0 PagePlus Lite and PhotoPlus 1.0 BONUS applications.

We've included two great BONUS applications as part of your Serif DrawPlus 2.0 CD-ROM. PagePlus Lite, our entry level desktop publisher and PhotoPlus 1.0, our photo-effects applet. These complement DrawPlus 2.0 to give you a complete graphics and publishing system with full page layout capabilities. If you like what you see, contact Serif to hear about great offers on our other related products and on upgrading the bonus applications to fuller versions.

2.0 Useful Tips on Using Serif Mega ArtPack images

2.1 Location and Structure of the Mega ArtPack images.

The Serif DrawPlus 2.0 CD-ROM contains the clipart images and the electronic catalogs associated with them. The clipart images are stored in the \CLIPART directory and the catalogs are stored in the \BROWSER directory.

Each clipart category is stored in a separate sub-directory of the \CLIPART directory. The images are uncompressed and can be accessed directly from the sub-directories by any program.

2.2 Using the Electronic catalogs

The electronic catalogs can be used to print your own paper based image reference or to search for particular images within a category. Just run the catalog programs by double-clicking on the icons in the Serif Mega ArtPack CD-ROM group. A startup box will be left displayed when you run a catalog program. To remove this, simply click with the mouse pointer over the startup box. Select FILE/PRINT to an image reference to your current windows printer. If you need help on using the catalogs, access the on-line help.

2.3 Is your CD-ROM drive installed as drive 'D' ?

If your CD-ROM drive is not D:, then an error box will appear when you try to use some of the functions within the catalog programs. If this error message occurs, simply enter the letter for your CD-ROM drive and continue.

3.0 Useful Tips on Using Serif Mega FontPack fonts

The Serif Mega FontPack fonts are not installed into your Windows system by the DrawPlus 2.0 installation program. It is up to you to decide which fonts you require and to install them into your Windows system by using the "Fonts" icon found in the Windows Control Panel. To help you with selecting the fonts, we have supplied a "Font Preview" in the form of a Write document. Use this to view the fonts. When adding the fonts to your Windows system, you must select the "FONTS" sub-directory of the Serif DrawPlus 2.0 CD-ROM to locate the actual font files.
