### **Hangman for Windows NT**

#### **Description**

Hangman NT is a computerized version of the well-known game of hangman. To play, you start with a word with all of its letters represented as underscore ( ) characters:

-----

As you guess the letters in the word, they are filled in:

\_ A N \_ M A N (two more letters to guess)

Until finally you have guessed every letter in the word:

HANGMAN

Or you've made 10 incorrect guesses.

#### **Running the Program**

After starting the program, the word will be selected, and you can begin guessing its letters.

### **Guessing Letters**

All letters that can be guessed are in the Unused Letters box. To guess a given letter, either press the corresponding button with the mouse, or type the letter with the keyboard.

### **On-Line Help**

To get help while the program is running, select the Help button with the mouse.

#### **Program Info.**

To get information about this program (i.e. version number, copyright, etc), select the About this Program... button with the mouse.

## **Quitting the Program**

When you're finished running the program, select the Exit Program button with the mouse.

### **Distribution and Payment**

Hangman NT may be freely copied without cost, provided it is not changed in any way. If you find the program useful, please send \$5.00 to:
