Welcome

Welcome to Creative Labs GlideSwitcher

This file contains the context sensitive Help used by GlideSwitcher.

This information is only seen correctly when used by the Control Panel.

GlideSwitcher

In the event that your computer system is configured with multiple Graphics cards that support the 3Dfx Interactive Glide API, this utility will allow you to select onto which device your Glide Application will perform.

Glide Devices

This list displays all Glide capable devices contained within the system.   Select a device from the list onto which your Glide Application will run.
