

Tektronix PhaserLink™ Software

Web-Powered Print Administration and Support

A Breakthrough in Print Support

PhaserLink software taps into the power of the Internet to advance printer administration, technical support, and compatibility. It's easy to use. It's powerful. And it's from Tektronix, the world leader in workgroup color printing.

Remote Control for your Printer

PhaserLink provides access to printer status and control, right on your desktop. With the click of a mouse, you can set resolution,

tray selection, TekColor™ rendering options, and more. It's a whole new level of productivity for workgroup printing.

On-Line Search and Assist

Every printer comes with an Instruction Manual, but finding the information you want isn't always easy. PhaserLink provides access to printer documentation, on-line. Now you can search through a virtual library of information, in a matter of seconds. Read about a topic on-screen or download a file, and print a hard copy. You can even visit the Gallery, featuring templates, calendars, greeting cards, and digital artwork, worthy of framing. Technical support has never looked better.

Platform Independent

Seamless compatibility for PCs, Macs, and workstations has arrived. PhaserLink works on any network routing TCP/IP protocol, with standard web-browsers, such as Netscape Navigator. Use it inside your company firewall, or across the Internet. It's as powerful as you want it to be.

Simplified Systems Administration

PhaserLink allows system administrators to configure the printer, perform routine troubleshooting, and track printer usage, without leaving the keyboard. Add pointers to your local web site for site-specific printer assistance and information. Switch on security for password-protected features access. You can even exchange electronic mail with Tektronix printer experts for custom Technical Support. Tap into the power of the Internet, with Tektronix PhaserLink, the industry's most powerful printer information access tool.

Tektronix PhaserLink provides access to an unprecedented level of information about your printer, across all platforms. With PhaserLink, print support is easy. Visit the PhaserLink demonstration site: http://www.tek.com/Color_Printers/support/phaserlink.html
