

## OTHER PROGRAMS:

I have written several other quality shareware utilities and games. They are described below, along with the price for each; price does not include disk or postage. To get all the latest versions to try out for yourself, send a formatted disk with a self addressed stamped return envelope, or send \$5 and I will supply the disk and pay postage.

## GAMES:

Escape! - Escape is a simple strategy game that's mind-bogglingly similar to an old computer game called Daleks, though there's lots more goodies in this game! Control a guy as he runs around mazes trying to collect gems, weapons, mines and the occasional extra life, finding tunnels to pass through; while stupid, but persistent, robots attempt to smooch him. Simple, but addictive as all-get-out. (\$10)

ColorFall - A simple, yet very fun and addictive, new game! Blocks of 4 colors (or patterns for B&W) drop down; you position and rotate them where you want them and let 'em drop! Try to get 4 or more in a row down, across, diagonally or in a block... But that's not all! Random things happen during play to either help or hinder your progress, such as a falling weight, a bomb and other strange things! Try it! (\$10)

SideMinder! - SideMinder! is a challenging game played against the computer. Your mission is to place 3D game pieces on the board, matching as many sides as you can. The more sides you match, the higher the score! Many different options are available, such as various playing boards, tournament mode, rotating pieces, number of colors (or patterns for B&W), and level of difficulty! Try it, you won't be disappointed! (1.02 fixes a Scoring bug and adds new game boards!) I take no responsibility for time or sleep lost due to the habit forming effects of this game! (\$10)
