

# BATTLECRUISER 3000AD™

## APPENDIX H TRADE DATABASE

### ITEM

Name of item.

### PRICE

Base price of item and subject to inflation, availability etc.

### CARGO BAY

Which cargo bay item are stored in. Most commodities are stored in cargo bays one and two (CB 1 and CB 2). Fuel minerals have their own storage tanks (FT). Weapons are stored in the weapons bays (WB 1 and WB 2).

### TYPE

Item's type class. This value determines the availability of the item by the Class level. A type HT item will be more available on starbases/starstations with a Class level of HT than on one with a Class level of RO. As a result the item will be cheaper on the HT type facility. A blank entry indicates that the availability is normal and the item is not a specialty. If the item's Slevel is 1 (illegal) this value will also be blank. See Appendix K, Galactic Cartography Chart for class levels.

### SYSTEM COMPONENT

The system for which this item forms a part. This item is required to repair this system. If the Clevel is 0, this component is a major component and this system will not function without it. If the Clevel is 1 then this item is a minor component and this system will have some functionality without it. This info is used for damage repairs etc.

A/UPGRADE	Armor Upgrade
E/UPGRADE	Engine Upgrade
R/UPGRADE	Reactor Upgrade
S/UPGRADE	Shield Upgrade
FUEL/CLOAK	Cloak Fuel
FUEL/SHIELD	Shield Fuel
FUEL/REACTOR	Reactor Fuel
R/MINERAL	Repair Mineral
P/SYSTEM	Primary System Part
SYSTEMS	Generic Systems Part

COMPUTER	General Computer Part
C/COMPUTER	CommLink Computer Part
L/COMPUTER	Logistix Computer Part
N/COMPUTER	Navitron Computer Part
T/COMPUTER	Tactical Computer Part
CLOAK	Cloaking System Part
ENGINE	Engine Part
REACTOR	Reactor Part
SHIELD	Shield System Part
WEAPONS	Weapons System Part

### CDISP

Component displacement, how much cargo space this item will require for storage. Illegal items require more cargo space since they have to be concealed amongst other items.

### DEFAULT

Default quantities for a newly commissioned Battlecruiser.

### CREW/CARGO/FUEL CAPACITY

CRAFT	Cargo Bay 1	Cargo Bay 2	Weapons Bay 1	Weapons Bay 2	Personnel Max.	Reactor Radine	Shield Plutonium	Cloak Iridium
BC	7500	7500	250	250	237	25000	10000	1000
SHUTTLE	2000	-	-	-	20	-	-	-
ATV	500	-	10	-	4	-	-	-
DRONE	1000	-	-	-	-	-	-	-

The drone and ATV each take up 750 units of cargo space which will reduce the cargo capacity of the shuttle they are loaded in.
