How to play KILLER CARS.

Killer Cars is a challenging game of strategy, ability and luck.
When playing Killer Cars you are presented with a sort of labyrinth made of five concentric race tracks. You control your car using the arrow keys, to increase your speed press the arrow key relative to the present direction of your car. Use the opposite key to decrease speed.

You have to collect all those yellow dots to earn points and go to the next stage.
Your job is not easy, however. There are a number of enemy cars trying to crash into you, their number, speed and artificial intelligence increase as you clear a stage after another. You can try to avoid the enemy cars, but you may also use two kind of weapons to destroy   them
(temporarily):

A time bomb. Drop it on your way and hope an enemy car runs into it. To drop a bomb push the **B** key;

A pacman.   Throw it in front of you in case of emergency. To throw a pacman push the **N** key;

Just before completing a stage, you may see a heart, a small pacman and a little bomb appearing on the labyrinth. Collect them, they increase your number of lives, pacman and bombs.

That's it.

(It would be an insult to your intelligence if I tried to explain the menu options also.)

Have fun playing Killer Cars.
