+ DARK EARTH:0

\$ System Requirements

Dark Earth runs on Microsoft® Windows™™ 95 with DirectX™™ 3 (provided on CD 1 as needed).

Minimum system:

- Intel® Pentium 75™™ or 100% compatible
- 8 MB RAM
- Four speed (4X) CD-ROM drive.
- Windows 95 compatible sound card

Recommended system:

- Intel Pentium 120
- 16 MB RAM
- Four speed (4X) CD-ROM drive.
- Creative Labs AWE32 sound card

Dream machine:

- Intel Pentium 166
- 16 MB RAM
- Eight speed (8X) CD-ROM drive.
- Creative Labs AWE32 sound card

Note: 16 MB RAM are required in order to play Dark Earth (32K)—High color version.

System_Requirements

\$ System Requirements

§ Installing DirectX 3

To install DirectX 3.

1. Put *Dark Earth* CD 1 in the CD drive with the label side up.
2. Open the **Start** menu and click **Run**.
3. Click the **Browse** button and look at the contents of CD 1.
4. Click the folder **Redist**, then click its **DirectX** folder.
5. Double-click **DXSETUP.EXE**.
6. Follow the onscreen prompts to set up DirectX 3. At the restart prompt, click **OK** to restart the computer.
7. Follow the instructions for setting up *Dark Earth*.

[Getting Started](#)

Installing_DirectX

§ Installing DirectX 3

§ Installing Dark Earth

Note: DirectX 3 is a system requirement for Dark Earth. As needed, install DirectX 3 before taking these steps.

To install *Dark Earth*:

1. Put *Dark Earth* CD 1 in the CD drive with the label side up.
2. Open the **Start** menu and click **Run**.
3. Double click on **SETUP.EXE** (or In the command line, type **D:\SETUP.EXE** and press **Enter**.)

Note: If the CD drive is another letter, such as E:, substitute that letter for D: in the command line. For example, type E:\SETUP.EXE and press Enter.

4. The first setup prompt appears onscreen. Choose an option for installing the program on the hard drive with **60 MB** or **300 MB** (recommended) and click **Next**.
5. Follow onscreen prompts to set up. Accept the defaults or change them. This process takes a few minutes, so onscreen meters display installation progress.
6. When setup is complete, a prompt appears. Click **OK** to return to the desktop and launch the game.

Installing_Dark_Earth

§ Installing Dark Earth

\$ Launching

To run *Dark Earth* from the Windows 95 **Start** menu after setup:

1. Click **Start, Programs, Kalisto, Dark Earth**.
Choose Dark Earth (256) to play in 256 colors or Dark Earth (32K) to play the High Color version (16 MB RAM required).
2. The monitor settings screen appears. Drag slider bars to set color saturation, brightness, and contrast; then press **Esc**.

Note: The first Dark Earth launch presents the introductory animation. To see it again, select it from the Cut scenes option on the Main Menu.

3. The Main Menu appears. Click **New** to begin a game.

\$ Exiting

§ Uninstalling Dark Earth

To uninstall *Dark Earth* after setup:

1. Click **Start, Programs, Kalisto, Dark Earth, Uninstall**.
2. The Uninstall program runs. When it finishes, open the hard drive with the Windows Explorer and throw the folder **Earth** in the trash.

See also

[Getting Started](#)

You can launch this help file, **Dark_E.hlp**, from *Dark Earth* CD 1, or install it on your hard drive. To use help on the hard drive without error messages, take these steps.

1. Put *Dark Earth* CD 1 in the CD drive with the label side up.
2. Open the **Windows Explorer** and view your CD-ROM drive.
3. Click the folder **Redist** to open it.
4. Copy and paste three files from the CD to your Windows **System** folder: **Setbrows.exe**, **Inetwh16.dll**, and **Inetwh32.dll**.
5. Use the **Windows Explorer** again to view the CD.
6. Copy and paste two files from the CD to PC desktop (or put it where you want on the hard drive): **Dark_E.hlp** and **Dark_E.cnt**.
7. You can now run help from your hard drive. If you have a modem link, you can use this to access the Kalisto Internet Web Site.

Note: Your PC needs Internet access (modem link) and a browser or navigator to use the world wide web. Whether or not you this access, take Step 6, or you'll get an error message when you launch Dark_E.hlp from your hard drive.

[About The Dark Earth Internet Web Site](#)

Uninstalling_Dark_Earth

§ Uninstalling Dark Earth

\$^K + Troubleshooting

Uninstall

If there are *any* setup problems, uninstall *Dark Earth* before trying to correct the problems.

Insufficient disk space

If the 300 MB install doesn't work, uninstall. Check the hard disk for available space. As needed, backup and clear some hard drive space; then install *Dark Earth* again with the 60 MB installation.

DirectX 3

CD 1 provides this Microsoft software. As needed, install DirectX 3 **before** installing *Dark Earth*. (Uninstall and redo the process as needed). If DirectX 3 causes problems, upgrade the video card, or contact the manufacturer, distributor, or Microsoft.

Poor Monitor Display

If the monitor display is unsatisfactory, change the settings. From within a game, press **F10**. The [monitor settings](#) screen appears. Use the mouse to drag slider bars and set color saturation, brightness, and contrast. Press **F10** again to return to the game.

Help Error Message at launch

This help, **Dark_E.hlp**, includes jumps to the Kalisto Internet Web Site. Even if you don't use the Internet, we recommend that you copy Internet access files **Setbrows.exe**, **Intewh16.dll**, and **Intewh32.dll** from **Earth/Help** folder to your Windows **System** folder for help to work properly on your hard drive.

Help Error Message requesting Internet Browser

If you get a help error message requesting a browser. You can set a browse path using **Setbrows.exe** located in Earth/Help.

Character moves without your commands

Make sure that your joystick is properly calibrated (or disconnect your joystick)

+ DARK EARTH:0

\$^K + Keyboard

Movement

Press cursor keys (↑ ↓ ← →), or turn **Num Lock** off and use the numeric keypad (**8, 2, 6, 4**). Tap a key to move Arkhan step-by-step. Hold a key to keep him going that way. Press **Shift** with a movement key (↑←← →→ or **8, 6, 4**) to run or strafe.

Action key (Spacebar)

To act or interact, walk up to a person or thing and press the action key. Get dressed. Open doors. Pick up inventory. Talk to people. Find secret passages. Operate equipment from Before. Arkhan can also ask about objects or give people things. First, take something out of Inventory; then walk up to a person and press the action key.

Key Functions F1-F7

You can have quick access to settings and controls by pressing Function keys.

Inventory

Press the action key to pick up inventory. Press **I** or **Backspace** to open Inventory and use things. In Inventory, give Arkhan things to handle or to use on himself (or someone else). During a game, press **0** to put away any inventory. Or, program keys **1-9** to use up to nine objects without opening the Inventory screen.

Combat

Arkhan can fight hand-to-hand or use a weapon from Inventory. To begin or end a battle, press **C** to toggle the Onscreen Interface in and out of Combat mood. *Dark Earth* offers two levels of combat in the Main Menu, Character Settings option.

\$^K + Combat

Before starting a fight, set a Combat level, arm Arkhan from Inventory (or let him fight hand-to-hand), and turn Combat on.

Setting Combat Level

Open the Main Menu, Character Settings. Press ←← or →→ to toggle the Combat level between **Normal** or **Automated**. The icon on the left of the screen is lit for **Normal** and dimmed for **Automated**.

Hand-to-Hand or Weapon

Arkhan can fight hand-to-hand or use a weapon from Inventory. You can also program keys **1-9** to use up to nine weapons without opening the Inventory screen. After programming the keys, press a key, say **1**, to arm Arkhan with that weapon, such as an ax. After a fight, press **0** to put away the weapon, if any.

Turning Combat on/off

During a game, press **C** to turn combat on and off. The bulb on the Onscreen Interface changes from white to red when Combat is on. In **Normal** mode (default), you direct Arkhan's fight. In **Automated Combat mode**, hold **Ctrl** to let Arkhan fight automatically (and win). Attack moves depend on Arkhan's weapon, armor, and his opponent's distance. For either Combat level, release **Ctrl** to move Arkhan with cursor keys (or keypad) as usual. Press **C** to end a fight.

Hint: Train with Zed and Phedora. Training does not drain Arkhan's life force.

\$ Combat Quick Reference

\$^K + Joypad

Dark Earth has simple keyboard commands. There are Joypad equivalents for most, but not all keyboard commands. Use the keyboard and the Joypad together, as needed. Also, all Joypads are different, but they have certain common features, including Direction pad keys (arrows), alpha keys (such as A, B, C, X, Y, Z), top keys (such as LS and RS), and often keys with names (such as Start or Select). Experiment with your Joypad to determine how your configuration matches the interface in *Dark Earth*.

Movement (Direction Pad)

Press the Direction pad (↑ ↓ ← →). Tap a Direction key to move Arkhan step-by-step. Hold a key to keep him going that way. Press Joypad **A** with ↑ ← → to run or strafe.

Action key (Joypad B or 2)

To act or interact, walk up to a person or thing and press the action key (Joypad **B** or **2**). Get dressed. Open doors. Pick up inventory. Talk to people.. Find secret passages. Operate equipment from Before. Arkhan can also ask about objects or give people things. First, take something out of Inventory; then walk up to a person and press the action key.

Inventory

Note: You must use the keyboard (I or Backspace) to open Inventory.

Use the keyboard (**I** or **Backspace**) to open Inventory. In Inventory, press ← → to select objects and icons; press ↑ ↓ to scroll through lists. Press the action key (Joypad **B** or **2**) to give Arkhan things to handle or to use on himself (or someone else). Press the Joypad **D** (or **X** or **4**) to have Arkhan use something on himself (food or drink).

Main Menu

Press the Joypad **D** (or **X** or **4**) open the Main Menu. Use the Direction pad to select options. Press the action key to select or set options. Press Joypad **Y** (or **5**) to exit menu screens.

Combat

Dark Earth offers two levels of combat (Main Menu, Character Settings). Arkhan can fight hand-to-hand or use a weapon from Inventory. To begin or end a battle, press Joypad **Z** (or **6**). To fight, press Joypad **C** (or **3**) and Direction pad keys.

Note: The Onscreen Interface is red in Combat mood. You must use the keyboard (Tab) to set Light or Dark mood on the Onscreen Interface.

Onscreen_Interface

\$ Onscreen Interface

K Onscreen Interface;Interface;Game Controls;Controls;Keyboard

+ DARK EARTH:0

Light Mood

(White bulb): Arkhan is his regular reasonable self. He takes time to think and to interact politely. Press **Tab** to set.

Onscreen_Light_Mood

Dark Mood

(Black bulb): Arkhan is more aggressive and acts on instinct. This can be an effective way to search rooms or interrogate people. Press **Tab** to set.

Onscreen_Dark_Mood

Combat Mood

(Red bulb): Ready to fight. Press **C** to turn Combat on and off.

Onscreen_Combat_Mood

Red Mercury

Indicates Arkhan's health and life force. Drops if Arkhan is injured (click the first picture on the left below). Food and drink renew him. If this drops to 0, game's over.

Note: After a certain point, Arkhan may appear to recover mysteriously. His life line will regenerate itself after an injury, but be careful- his contamination feeds off of such injuries and benefits to it's advantage...

Onscreen_Red_Mercury

Injury

Red mercury is dropping, indicating injuries to Arkhan. If this drops to 0, game's over.

Onscreen_Injury

Contamination Level

Outer column **blackens** if something poisons Arkhan (click the second picture from the left below). A race against the clock begins. He must find an antidote. After Arkhan is contaminated, he can use the special attack move (**Ctrl+Shift+↑**).

Note: The special attack move aggravates Arkhan's contamination.

Onscreen_Contamination

Contamination Rising

Something is poisoning Arkhan. He must find an antidote. He can use the special attack move (**Ctrl+Shift+↑**), but it makes contamination worse.

Onscreen_Contamination_Rising

Opponent Injury

This meter appears during combat. It shows the opponent's health and life force. This meter drops as Arkhan injures his rival. If this drops to 0, that character is a goner.

Onscreen_Opponent

Scuba

This meter appears during underwater sequences. It shows Arkhan's available air supply. If his oxygen runs out in the deeps, game's over.

Onscreen_Scuba

\$^K + Inventory

Arkhan can find and store many things in Inventory, weapons, food, drink, keys.

Move Arkhan near an object and press the Action key. If it belongs in his Inventory, a quick Inventory screen opens showing the objects Arkhan has collected. Press **Esc** or **I** (or right-click) to return to the game. To open the Inventory screen in the game, press **I** or **Backspace** (or click). Or, program keys **1-9** for fast access to nine Inventory objects. During a game, press **0** to put *any* inventory item away.

Click hotspots on the picture below for more explanations.

\$^K ++ The World of Dark Earth

December 24, 2054

The horsemen of the Apocalypse rampaged across the Earth astride their fiery steeds. Not by war, plague, flood, or famine did the known world perish, but in a deluge of flame. The Earth plunged into darkness. For the few survivors, a new era of chaos and desolation began, the age of *Dark Earth*.

300 Years Later

The Great Cataclysm, the cause of which is lost in legend, changed the face of Earth forever. Where Before shone blue skies, now hangs the Black Shroud. This dome of dust, blotting out the heavens, broods over the dreaded Darklands. For those who dare wander in its swirling shadows, the Darklands hold many deaths. Killer storms, wild beasts, and creatures lurk in the gloom, waiting for their unlucky prey. Out there, some whisper, awaits a dark substance, bubbling, pulsating--almost alive. They say a fate worse than death awaits anyone who touches this substance and survives...

Stallites

In this nightmare world, a few islands of hope and civilization still cling to life. These are the Stallites, fortified cities built by the survivors of The Great Cataclysm. Places of refuge, warmth, and safety, the Stallites are the only places on *Dark Earth* where mysterious shafts of sunlight pierce the Black Shroud of the sky.

§^K + The Adventure Begins

Arkhan of Sparta

Dark Earth is the story of [Arkhan](#), a man of Stallite Sparta. Although born to the Sunseers, the ruling caste of the city's theocracy, Arkhan is not much of a student. He prefers exploring his world and meeting interesting people. Arkhan's father, Rylsadhar, decides that his son is not meant to be a [Sunseer](#) yet, and agrees to let Arkhan join the [Guardians of Fire](#), the security forces of Stallite Sparta. Since Arkhan is running a bit late, as usual, Zed summons him to urgent guard duty on the orders of Provost Dhorkan.

Arkhan's Quest

Dhorkan orders Arkhan to report to the Great Temple of the Sun for guard duty. There, Arkhan stumbles onto a treacherous plot that threatens to blot out all Light, leaving only darkness and despair. As Arkhan struggles with an intruder, he is exposed to...something. An unknown substance which causes painful and hideous transformations. In a race against time, Arkhan must find an antidote. His quest has physical and psychological dimensions. Little by little, Arkhan comes to recognize his true friends—and his real enemies. His destiny intertwines with that of Stallite Sparta. Faced with trials, tests, and ordeals, Arkhan must decide whether to don a hero's mantle—or not. In the process, he must struggle with his own heart of darkness. And, finally, learn something about the mysteries of *Dark Earth*. Is Arkhan really a match for the task? The outcome is up to you.

#^s \$^K + Layout of Stallite Sparta

{bml sparta.bmp} Like most Stallites, Stallite Sparta is built of stone and metal with a fortress style emphasis on defense. This city has two districts. The [Upper City](#) forms a hub around the well, including the barracks of the [Guardians of Fire](#), the Great Temple of the [Sun God](#), and the Builders' Hall. Atop the Temple is the FaRaha, a system of mirrors, which acts as a security spotlight and beacon. The [Lower City](#) contains residential housing and assorted other buildings with fields and orchards at its edge. The Scavengers live in abandoned buildings, shacks, or old underground shelters. At ground level, Sparta has a surrounding wall with defensive structure spaced along the ramparts.

⁺ DARK EARTH:0

#^S ^K + Social Structure of Stallite Sparta

The People

Three centuries of life on *Dark Earth* manifest as physical and social adaptations in the people. Both men and women tend to be of medium height, muscular, and fairly stocky. Despite a poor diet, their bodies store fat well, increasing cold tolerance. They are also resistant to toxins. Most people have lighter skin, more hair, paler eyes, and better night vision than their ancestors. Socially, the people are members of two main groups: *Lightdwellers*, who live in Stallites, and *Wanderers*, who brave the [Darklands](#), roaming from Stallite to Stallite.

Lightdwellers unite in their common need to survive and in their fervent religious belief that Stallite Sparta is a miraculous gift of the Sun God. What else could account for the blessing of light? With theology the dominant force, the Stallites' social structure is a rather rigid religious hierarchy with five castes: [Sunseers](#), [Guardians of Fire](#), [Builders](#), [Providers](#), and [Scavengers](#).

Social Footnote

Humans no longer fight wars on *Dark Earth*. In a world, where survival is never certain, people have more dangerous enemies than their neighbors. Combat skills, however, endure among the Guardians of Fire and the Scavengers. These people are most likely to brave the Darklands, where there are *things* that creep out of the dark...

⁺ DARK EARTH:0

\$^K + Flora and Fauna

Flora

Dark Earth supports drastically reduced populations of plants and animals, due to the ecocatastrophe caused by the Great Cataclysm. Surviving plants are hardy species that survive with little light, such as algae, lichen, and fungi (staple foods). One newly evolved plant is Rueg, from which The Guardians of Fire extract an oil for lamps.

Fauna

Wild animals still roam the [Darklands](#). (Providers hunt them for meat.) Most of these animals are descendants of omnivorous species that survived and adapted to conditions on *Dark Earth*. Some Stallites still manage to support small herds of cattle. A few Stallites are famous for the tame [bears](#) owned by The Guardians of Fire.

Birds

Without trees for perches or landmarks for migration, birds live around Stallites and roost on buildings, surviving on a diet of insects. Travelers, who view a Stallite from afar, often see hundreds of birds flying endlessly, round and round. Despite the birds' relative abundance, the [Providers](#) do not hunt them, because religious dogma decrees that birds are the souls of people seeking to atone for their sins.

\$ Flora and Fauna

^K Flora;Fauna;Plants;Animals

+ DARK EARTH:0

Rahal, symbol of the Sun God

{bmc Rahal16.bmp}

rahal

Sunseers

{bml sunseer.bmp} The Sunseers are the priests, rulers, teachers, judges, and healers of *Dark Earth*. Each day, as the sun illumines the Great Temple, Sunseers pray to the Sun God; while the faithful prostrate themselves before the [Rahal](#), His symbol. The ruling council of Sunseers, overseen by the Great Sunseer, has absolute power in Stallite Sparta. The council allocates resources to the people, sends expeditions into the Darklands, and judge crimes committed in Stallite Sparta.

sunseer

Guardians of Fire

{bml guardian.bmp}The Guardians of Fire enforce edicts of the ruling council, distribute resources, and act as security forces. At night, the Guardians of Fire ignite huge braziers and torches to light up the streets, and, if there is a fire, they act as firefighters. They are also in charge of the FaRaha, a system of mirrors on top of the Great Temple, which acts as a security spotlight, as well as a signal beacon for Wanderers in the Darklands. As a rule, Guardians of Fire are masters of the martial arts.

guardians

Builders

{bml builder.bmp} The Builders are the architects, engineers, goldsmiths, metalworkers and artisans of Stallite Sparta. They construct and maintain all city structures. Some builders make furniture and tools; while others are goldsmiths and metalworkers. Builders also work the salt, coal, and mineral mines near the Stallite. Certain Builders still know how to use and repair electrical circuits, and some of them are imaginative inventors. The Sunseers direct the Guardians of Fire in the distribution of materials produced by the Builders.

builders

Providers

{bml provider.bmp} The Providers are the farmers and hunters of *Dark Earth*. They have difficult but vital tasks--tending the meager fields and orchards within the Stallite; raising cattle; and finding game. Providers are adept at recovering food and other treasures (cans, freeze-dried foodstuffs) from Before in the ruins of ancient cities found in the Darklands. The Sunseers demand a tithe of material contributions from each of the Providers, which they redistribute to the rest of the population.

providers

Scavengers

{bml scavengr.bmp} The Scavengers form the lowest cast of Stallite Sparta. All Scavengers survive by their wits. Many of them sift through garbage or scour abandoned ruins for items from Before, which they barter for food, fuel, or a little light. Some Scavengers live by burgling and thieving, even though they risk banishment if caught (a virtual death sentence). A few volunteer for expeditions into the Darklands in the hopes of improving their lot. Some simply prefer their lifestyle to the rigid mores of the higher castes.

scavengers

The Darklands

{bml darklnds.bmp} Beyond the walls of the Stallites brood the vast territories of The Darklands. Lightdwellers fear the Darklands with a pathological intensity that traps most of them within their Stallites' walls. Only the brave or the desperate dare go into this desolate landscape of endless night. No one ventures alone. There, Death lurks everywhere, in asphyxiating dust storms, poison mists, lethal cold, and the jaws of beasts. Even the plants are dark in color, contributing to the sinister air of desolation. And, recent tales, told by roaming bands of Wanderers, are the stuff of nightmare. Strange creatures crawl out of the dark where...something waits.
