

ElectricMonk.....

an Electric Monk who believes the world is pink, on a bored horse..
in Douglas Adams' Dirk Gently's Holistic Detective Agency, and beyond,
is a scheme also inspired by Will Robinson's Hologram Robotic Suit in Lost In Space,
suggested by an email with a LIS attachment sent in by ImacWA@aol.com.
But, most of all, **ElectricMonk**
is made to inspire Todd Johnson to fall over sideways™ again, and again, and again,
and to thank him for being such a proficient and generous writer at GUI Junky..

..... Funky Postcardware applies to **ElectricMonk**.

After actually receiving a few from the coolest persons from around the world,
some with the weirdest taste in postcards, this author is hooked on hand-picked cards,
so do, do send all your tackiest, beguiling, kinky, electrifying postcards to:
