

RND Import Translator

RND is the file format used by AutoDesk's AutoShade rendering program. The RND Import Translator is compatible with Autodesk AutoShade version 2.0.

Notes

Scanline RND files are not supported.

RND has a limit of ten points in a polygon.

Since background color is not supported in RND files, black is assumed as it is in AutoShade.

Importing an RND File

To import an RND file:

1. Open the File menu and choose Import. The Import dialog box opens.
2. Click the down arrow in the List Files of Type list box.
3. Choose RND - AutoDesk AutoShade.
4. Change to the drive and directory you want.
5. Highlight the name of the file you want to import.
6. Click Import. The dialog box closes and the imported file appears in the drawing area.
