You can view documents published to Corel Barista using your Web browser.

To display your Web page, place the Corel Barista class files in the same directory as your Web page. The Corel Barista Class files are installed in a sub-directory called /Barista when you install

CorelDRAW.

It's a good idea to keep all your Corel Barista files in a single directory on your Internet server or local hard drive so you only need to copy the Corel Barista class files once.
