

To print several cards on one page, you will need to make a few changes.

1. Click File menu, Print, or [click here](#).
2. Click the Preview button.
3. To print more than one card on a single page, click the Options button on the Property Bar.
4. Click the Edit button that appears beside the Positioning list box.

5. Enable the **Clone Frame** check box, then click OK.
