You should now have four parent color styles appearing in the Roll-Up. If you cannot see these colors, double click the Graphic1 folder

If you expand these colors, you will find the linked child shades listed below the parent.

To apply logical names to the colors, try the following:

1. Right-click the color named "Green", then click Rename

2. Rename it "Car Color."

3. Repeat the above procedure, renaming "Cyan" to "Glow."
