

You can change toolbar buttons so that text appears, instead of bitmaps.

1. Click the Toolbars tab in the Customize dialog box, then right-click the toolbar button you want to change on the toolbar, then choose Properties.
2. Enable the Show Text button in the Button Properties dialog box.

The text that appears in the box below will now appear in the toolbar, instead of the bitmap.

3. Type some text in the text box below.
