

The Use Object Fill option applies the fill of the original object to each of the surfaces that extend from it. If you enable the Drape Fills option, the fill is applied once to the whole extrusion.

1. **Select the extrusion** with the Pick tool.
2. In the Extrude Roll-Up, enable the Use Object Fill button.
3. Enable or disable the Drape Fills check box.

4. Click the Apply button.
