

Changing the placement of **Artistic text** vertically changes the position of the text on the path.

Options include placing text below, on, or above the path.

1. Select the text/path group with the **Pick tool**. Make sure both the text and path are selected.
2. In the Property Bar, choose **On Path** in the Vertical Placement list

box.

You can also type a precise value in the Property Bar to change the vertical position. See the Online help.
