

6. Enable the Dithering check box, if desired. Dithering mixes the pixels of the available color to simulate colors that are not available in the color table.

7. To specify the dimension of the bitmap, do one of the following:
 - ◆ Choose a size from the Size list box.

 - ◆ Type values in the Width and Height boxes. Enable the Maintain Aspect Ratio check box to maintain the proportion of height to width. (cont'd)
