

You can now view this document directly in your Web browser to see the results. Now that you have an HTML tagged file, you can use the tagged file in another Web document.

1. In a text editor, open the .HTM file generated by CorelDRAW.
2. Copy (CTRL + C) all HTML codes and text from the `<IMG SRC = . . . >` tag to the `</MAP>` tag to the Windows clipboard.
3. Paste (CTRL + V) the text in your other HTML file where you want the graphic to appear.
