The Frozen option allows you to "freeze" the lens's current content so that it remains the same no matter where you move the lens. To try this, you'll need a lens to use.

  Click here to create a sample lens.

1. Select the lens with the Pick tool.

2. In the Lens Roll-Up, enable the Frozen check box.

3. Click Apply.

4. Move the lens to a new position.
