

The Viewpoint control allows you to change what a lens displays without moving the lens. You move the **viewpoint** by dragging it. To try this option, you'll need a lens to use.

[Click here](#) to create a sample lens.

1. Select the lens with the **Pick tool**.
2. In the Lens Roll-Up, enable the Viewpoint check box.

3. Click the Edit button, then drag the viewpoint to a new position.
5. Click the Apply button.
