

In multi-page documents, you can link a **frame** on one page to a frame that's on a different page. To link frames on different pages:

1. Select the starting frame with the Pick tool.
2. Click the text flow tab at the bottom middle of the frame.
3. To go to the page that contains the frame, click the **Navigator** and type a page number. Click OK.

4. Select the frame into which you want to continue the text flow with the Pick tool.
