

To replace all of the spot colors with process colors (CMYK) , do the following:

1. Click the Replace A Color Model Or Palette button, and click the Next button.
2. Use the default settings to convert all fills to CMYK. Notice that you can also change all outlines to CMYK.
3. Click the Finish button.
4. Repeatedly click the Replace button until all the objects are found, or click the Replace All button.
