

The Scrapbook is a Roll-Up that provides drag and drop access to the folders that store CorelDRAW's extensive collections of clipart, designs, and photos, as well as a collection of preset fills and outlines. In addition, the Scrapbook allows you to organize, store, and access your own favorite designs, fills, and outlines.

In this Tutor, you'll learn how use the Scrapbook to add clipart and photos to your drawings. You'll also learn how to add objects, fills, and outlines to the Scrapbook for future use.
