

Before you start using the Scrapbook, you'll need to do two things. The first is to get the two CDs that contain CorelDRAW's clipart and photo collections.

Since you'll be using the Scrapbook to add clipart first, insert the Clipart CD (Disc 3) into the CD-ROM drive now. Once the CD is in the drive, you can open the Scrapbook's Clipart section.

- ◆ Click Tools menu, Clipart. When the Find CD dialog box opens, click OK to confirm that CorelDRAW has found the Clipart CD.
