

Before you start applying or creating your own favorite fills and outlines, you need to display the Favorite Fills and Outlines section. You can do this in one of two ways.

If you have the Scrapbook open, click the **Favorite Fills and Outlines** tab.

- ◆ If you don't have the Scrapbook open, click Tools menu, Favorite Fills and Outlines.

You'll also need some objects to work with.

[Click here](#) to create these objects.
