

CorelDRAW's Script and Preset Manager is a powerful tool that allows you to record and play back a series of actions, called a "script." A script can create an object with specific attributes. It can also apply a set of commands to an object.

The Script and Preset Manager also gives you access to a collection of preset scripts that you can use to create or change objects in your drawings.

In this Tutor, you'll learn how to create and play back some simple scripts. You'll also learn how to use a preset script.
