

If you've been following the steps to this point, you'll probably already know how to apply a preset script. You just select the script you want and press the Play button.

1. Using the **Pick tool**, select the object to which you want to apply a script.
2. In the Script and Preset Manager, choose a preset script from the list box. Scripts are listed alphabetically.

3. Click the **Play** button.
4. Repeat steps 1 to 3 using other scripts.
