

After you assign a URL address to your object, specify the hotspot of your graphic. The hotspot is the area that the viewer of your document can click to access the linked HTML document. To use the object's outline as the hotspot:

1. Right-click any toolbar, and click Internet Objects from the menu.
2. Select the Internet Object with the Pick tool.
3. In the Internet Objects toolbar, click the Use Object button in the Internet Objects toolbar.
