

If you have several objects in your drawing and you want to identify the ones with URLs, use the Internet Objects toolbar to show the URL objects in your drawing and specify the color of URL objects.

1. If the Internet Objects toolbar isn't displayed, right-click any toolbar and click Internet Objects from the menu.
2. Click the Image Map button. All objects to which you've assigned a URL appear in the colors specified in the Internet Objects toolbar. You can change these colors to suit your needs.
