

Install TCP/IP Protocol

This component has to be installed before you can proceed with the setup. Please step through the following procedure:

- click the Add button in the Network window,
- double-click the Protocol item in the Select Network Component Type window,
- select Microsoft from the Manufacturers list in the Select Network adapters window,
- select the TCP/IP item from the Network Protocols list,
- click OK button to close the Select Network Component Type window,
- highlight the Dial-Up Adapter, then click on Properties,
- select the Bindings tab and ensure that TCP/IP is checked,
- if not, enable it by clicking the check box,
- uncheck any other entries in this window -- only TCP/IP should be checked,
- click OK button to install the components,

Please restart the computer after completing the procedure, then run the setup again.
