Suggested One Sentence Description For Archive:

Handy program to solve word puzzles inc. crosswords.

Suggested Description For Archive (Short):

Powerful, easy to use, 32-bit word puzzle solving program for Windows '95/NT. Solves crosswords, anagrams, in-words, pair-up puzzles, word searches and more. Features a 140,000 word core dictionary, user dictionary facilities, spell checker and a 5 MILLION synonym thesaurus!

Suggested Description For Archive (Long):

Turbo Solve! Pro is a powerful, easy to use, 32-bit word puzzle solving program for Windows '95/NT, capable of solving a wide variety of word puzzles including crosswords, anagrams, in-words, pair-up puzzles, word searches etc.

Turbo Solve! Pro can eliminate hours of frustration trying to find solutions to crossword puzzles etc. Excellent for completing half finished puzzles. You don't have to waste time looking words up in a paper dictionary; simply select the appropriate search mode, enter your search and hit "GO!". Turbo Solve! Pro will instantly find potential solutions for you to browse through - it's as easy as that!

Turbo Solve! Pro's large 140,000 word core dictionary, user dictionary facilities and 5 MILLION synonym thesaurus ensures you get the solutions you require! It can also check YOUR solutions with it's built-in spell checker and handle search strings of up to 32 characters in length.

New Features In This Professional Version:

- * **IMPROVED USER INTERFACE** - The main window is now much larger. Unnecessary graphics have been replaced by a larger words found list making browsing much easier. Many adjustments have been made to provide you with the most user friendly interface possible.
- * **IMPROVED INSTALLSHIELD SETUP PROGRAM**
- * **ANAGRAMS AND IN-WORDS SEARCH MODES CAN NOW USE WILDCARD CHARACTERS (?)**
- * **IMPROVED IN-WORDS SEARCH** - Now you can set a minimum length for words found. This eliminates a lot of the 1, 2, 3 etc. character words which are not that useful. You can also tell Turbo Solve! Pro to only find words which contain a given character from the search string - Very useful!
- * **POWERFUL 5 MILLION (!) SYNONYM THESAURUS** - Excellent for crosswords where you are given a word as a clue such as "Cold" or "Excited", and the answer is a synonym!
- * **HANDY SPELL CHECKER** - Spelling not too good? Use the built-in spell checker to ensure your spellings are correct. This stops you from entering incorrectly spelt words into a crossword grid (or some other word puzzle) which could prevent you from completing other clues.
- * **PREFIX/SUFFIXES SEARCH MODE** - Lists all words beginning or ending with a given string such as CatFISH, DogFISH, FISHerman etc. Useful for many types of word puzzles.
- * **PAIR-UP SEARCH MODE** - Enter a list of words and let Turbo Solve! Pro pair them up. E.g. You enter BOOK, CAT, CHECK, DOG, FISH, OUT; Turbo Solve! Pro will find CATFISH, CHECKBOOK, CHECKOUT, DOGFISH etc.
- * **WORD SEARCH MODE** - One of Turbo Solve! Pro's most interesting search modes! Simply enter a word search grid and the list of words you want to find. Hit "Go!" and Turbo Solve! Pro will highlight them in the grid. If you don't know what words you are looking for, you can let Turbo Solve! Pro loose on the grid and it will attempt to find the words (even without you telling it what to find!!).
