AlienDetector Pro

Introduction:

Welcome to AlienDetector Pro, the most advance system for the detection of Extraterrestrial Life.

AlienDetector Pro was created as a direct result of the overwhelming response to the original AlienDetector. We knew that with the original we had created unique tool, yet it left many unanswered questions.

For AlienDetector Pro we recruited one of the greatest authorities on Extraterrestrial Life; Dr. Wendal Tittlebaum from the Wisconsin Institute for Extraterrestrial Studies. After many months of painstaking work we have created what we feel is the foremost tool for not only the detection of extraterrestrial lifeforms but also for the detection of repressed abductee experiences.

And just as with the original, AlienDetector Pro is rated 99% accurate with a 100% margin for error.

Additional Information is available at the Wisconsin Institute for Extraterrestrial Studies World Wide Web site at http://www.magiccarpet.com/~kbingham/WIES

AlienDetector Pro is Copyright © 1996-1997 by Keith Bingham.
AlienDetector Pro may be freely distributed so long as it remains in it's original unmodified state with all accompanying files.

Use:

The following describes the use of each of AlienDetector Pro's features:

Minimize: This will minimize AlienDetector Pro to the system tray.
Scan: This will scan for the presence of Extraterrestrial Lifeforms providing a detailed report of the scan results.
Abductee Scan: This will scan an individual for a repressed   abduction experience.
Settings: This will allow you to tailor the scan settings to your needs.
Use Sounds: Toggles sound on/off.
Monitoring: Toggles monitoring on/off. When monitoring is active AlienDetector Pro will constantly monitor the surroundings for Extraterrestrial Activity alerting you in the event of activity.
Scanning Options: Toggles the various scanning options on/off.
About: Displays version and copyright information.
Exit: Exits AlienDetector Pro.
