Introduction

The S*ystem Analyst for Windows* ("***SAW***" for short) is marketed as **FREEWARE**. Yes, you don't have to pay for it in order to use it. The "*program"*, "*software"* or "*material*" mean all the *System Analyst for Windows* files and all the associated files that come with the original package. The "*author"* is the copyright holder of the program.

The following lists your rights and your warranty:

Licence Details

The System Analyst for Windows and its *Install Program* are **Copyrighted** by me, **© Catalin-Adrian Silasi**, **© 1992-1995**, **ALL RIGHTS RESERVED**.

You are granted a free licence of this version (1.02 only) of the program. Further versions should be free as well, but check the new ***Licence*** file for changes/details/etc.

This program and associated files may be copied, used and posted on any BBS, FTP site, etc. without charge or permission. It may be included in a companion disk with any book or magazine, and included in any freeware/shareware library/CD-ROM, **as long as** the program and associated documentation **are not modified**. All files must be included, except *Install.exe* (if you wish) if an installation program is provided. The program details should be specified (Name, Purpose, Author, Rights, etc.). If you need to add something, please add a new file, don't append the original ones. You should charge only for the disk provided (if any) and, please, very reasonable

duplication/handling/administrative/etc. costs. You should specify that the program itself is **free**.

Under **no** circumstances should this program be included with commercial software or distributed either alone or with other commercial software without prior **written** permission from the author (excepting the ones stated in the paragraph above). There are no other exceptions from these rules & regulation without written permission.

"*SiSoft Software*" is constituted by me. **As far as I know**, there is no company which has this exact name. Any resemblance to **any** real/unreal company is purely coincidental.

You are urged **not to modify/hack/decompile/reverse-engineer** the program even if you *spot* a bug. You might create others, and I don't want to be blamed for other people's mistakes. I make more than enough myself... Should you do it, you are in violation of the copyright laws by creating derivative works based on this program. As I ask you for nothing - at least I deserve some respect...

If you copy of SAW fails the *Integrity Test*, delete it and obtain another version. Inform the site that it should get an original copy.

Your warranty

THE PROGRAM IS PROVIDED "AS-IS". NO WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, ARE MADE AS TO IT OR ANY MEDIUM IT MAY BE ON. I WILL PROVIDE NO REMEDY FOR INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES ARISING FROM IT, INCLUDING SUCH FROM NEGLIGENCE, STRICT LIABILITY, OR BREACH OF WARRANTY OR CONTRACT, EVEN AFTER NOTICE OF THE POSSIBILITY OF SUCH DAMAGES.

(You might think this is unfair, but this is almost what all commercial companies offer you, even if you paid 100's of $$$ or £££ for it, so what could you expect from me **?**...)

Notes

The **ctl3d.dll** file included in the package is the *Microsoft Dialogs Extensions Library* and in original form (Version 2.05). Of course, you are advised to use the newest. This file is freely distributable with programs that use it.

With the risk of repeating myself I hope I have answered most of the questions that may arise from its use. If not, contact me.

By installing and/or using this program you agree to be bound by the stated rules and regulations.

If you do not agree with the stated rules and regulation or you do not understand the meaning of the legal terms stated you should uninstall the program or delete all the files included in the package.
