IconMaster. v 1.0 by Nick Schlott
Public Domain Software
(shareware)

IconMaster is an init/cdev which changes your Hard Drive or start up Hard
Drive disk icon from the boring apple HD icon into any number of icons,
including the ***Banana Junior Icon***, not to mention several
other ***Bloom County*** personages.

To start up this init, drop it into your system folder, restart, and then goto
your apple menu. Goto the control panel, and **IconMaster** should be there.
Select it and go to it.

Sorry I couln't be of more help folks, but I seem to have misplaced the
actual
help file that Nick wrote. When I find it again, I'll upload it. Sorry Nick.
