MacPhase™
by The Otter Solution

Version 1.1.0

Thanks for downloading!!!

Thanks for downloading MacPhase. We hope that you find MacPhase useful.

There have been several new features added over 1.0.0t which have been added.

- Gradient Plots
- Improved Contour Plots
- A new method of handling MacPhase settings.
- Save files as 8-bit TIFFs
- More control over MacPhase < > System clipboards
- More graph options; improved line styles and sizes, etc
- RPN Calculator for quick arithmetic image calculations
- A customized system clipboard which you can use in your own programs
- Code modules can be added on to MacPhase.
- Some Balloon help.
- Several bug fixes
- and many others.

Help Us!

We would like to keep improving MacPhase, so we ask for some feed back. If you have any ideas for future additions to MacPhase please let us know.

We would like to establish a library of MPCD code modules which could be distributed with MacPhase. If you do develop a code resource and think it might be of use to someone, please email it to us.

We'd like to get some examples of how you are using MacPhase to do your work and we'd like to have your permission to use these in some of our marketing. If you do send some examples, be sure to include credits and an explanation of what the examples represent. Any examples received will be considered for use in our marketing.

What's the next step for MacPhase...

We are now focusing our efforts on widening MacPhase's exposure. We are trying to go semi-

commercial. Our first ad appeared in the July MacWorld catalog section. We haven't

decided on the fate of MacPhase as shareware... But we will continue to support our shareware users.

What's In the New Commercial Version...

There are several new features in the Commercial version of MacPhase. These features are not included in this shareware version which you have just downloaded.

- Completed Balloon help.
- Core Apple Events.
- Ability to read XYZ data.
- Interpolation for scaling data and filling in missing data.
- More control over color mapping to data values.
- Graph annotation.

Pricing...

- If you would like to become a registered user of the shareware version and manual please send $75 US.

- If you would like the commercial version and manual please send $155 US.

- If you would like to receive a demo commercial version, please send $10 US.

NOTE: Outside the US please add $10 for shipping and please use checks drawn on banks which have a US address on them. If you are unable to do this, please include an additional $15.

Support...

If you have any questions, please don't hesitate to email us. Customer support is provided on America On-Line, just use the keyword "mbs". Also, a library of "Add-Ons" will soon be available in the Otter Solution customer support area on America On-Line.
