

Please feel free to distribute this software as you like, the only requirement I would make is that you enclose this README.WRI file with the code.

Blox is written using Borland 's C++ for Windows 3.0 and the Object Windows Libraries. I've tested it under Windows 3.0, 3.1 and Win-OS2 (OS/2 2.0's windows compatibility mode.) and it seems to be okay.

If you experience any problems with the app. or have any suggestions for improvements or for future applications, please contact me either on CompuServe as Jim McGinty [100034,121] or by surface mail at:

610 Webstersland,
Westport,
Edinburgh EH1 2RX
SCOTLAND

If you would like a copy of the source code, then please send an SAE to the above address, enclosing either £5 sterling and a suitable diskette or £6 if you want me to provide a diskette. In the latter case, please specify 3.5 or 5.25 format.

Disclaimer:

The author accepts no liability for any loss of data, life or sanity incurred through the use of this application. Use of the software implies acceptance of any and all side effects with a wry smile and a philosophical sigh of "That's life!".

:-) Enjoy.
