

SCARE

September 1993

General

Scare is a little program to haunt your Windows for Halloween.

System Requirements

1. Windows 3.X
2. VBRUN300.DLL - this is a Visual Basic program
3. MultiMedia wave playing capability - not required, but does enhance the program

SetUp

1. Make sure you have a copy of VBRUN300.DLL in your Windows\System directory. I have not supplied a copy of this file due to its size. You can obtain a copy from most Bulletin Boards.
2. Copy the following files to the directory of your choice (i.e. c:\scare).

SCARE.EXE

Supplied *.BMP files (see below)

Supplied *.WAV files (see below)

3. Install SCARE.EXE in the Program Manager Group of your choice. Refer to your Windows manual for details. Place it in your StartUp Group if you want it started each time you start Windows.
4. Double Click the program icon to start the program.

Program Operation

When the program starts you will see Franky appear in the upper left corner of your screen and a creepy sound if you have MMWave playing capability. He will then disappear after a few seconds. Every 1/2 to 3 minutes another Halloween Visitor will appear with a scary sound. Note that when they appear, they will not grab the focus from what ever you are working on and will disappear automatically after several seconds. To end the program simply double-click on the monster's picture when he appears. An about box will appear and clicking Ok will end the program.

You may add your own pictures (standard 96 X 96 BMP) and sounds (standard Windows WAV) to the program by placing them in the SCARE.EXE directory. Have Fun!

Warranties

The author (me) assumes no liability for any loss you may associate with the use of this program. I have tested this program on my computer and have experienced no problems, however, I do not know what your system is like. If you have a particular problem or question you can contact me on Compuserve (see info below). I will be glad to try to help.

ShareWare

This Program is NOT FREE. If you use it please send \$1.00 to:
