## **CCZip the best way to Zip and UnZip files using Windows 95/NT**

### **Tips, that will make your life working with ZIPs easier**

- 1.- On the Tools-Options Default directory to look for ZIPs put the directory where all the files you download from the internet are.
- 2.- Create a ZIP temp directory on your hard drive to try out software downloaded from the internet and to put the contents Setup programs that are distributed as ZIPs.
- 3.- It is much better to Drag+Drop files from the file manager or Win95 explorer because there you can easily sort files, and do lots of stuff you cant do with Windows common dialogs.
- 4.- Before extracting files from a ZIP into a directory that is not new double check if you really want to overwrite the existing files.
- 5.- When you doubleclick on a file named SETUP.EXE or INSTALL.EXE, CCZip will automatically UnZIP the contents of the complete ZIP to a TEMP directory and run the setup program, now you don't have to do this manually.

## **CCZip the best way to Zip and UnZip files using Windows 95/NT**

CCZip is a ZIP/UNZIP utility developed for use in Windows 95, that allows you to build and extract files from ZIPs, CCZip is 100% PKZIP 2.04g compatible.

CCZip makes working with ZIP files really simple, there is not much to document.

### **To Extract files from a Zip:**

1.- Click on the Open button and a Windows common dialog will appear on screen, there select the ZIP from where you want to extract files and click on OK. All the files compressed in the selected ZIP will appear on screen. You can sort the files by name, uncompressed size, compressed size or date-time by clicking on the first row the sort criteria.

2.- If you want to extract a specific file or group of files select them. Click on the Extract button and select the directory on which you want to extract the files (you can create a new one). On the right side of the dialog you may select the convenient extract options, when ready click on OK and CCZip will extract the files from the ZIP on to the selected directory.

### **To Add files to a ZIP:**

1.- Open or create a new ZIP, by clicking on the New (or Open) button

2.- If you opened a ZIP file all the compressed files in that ZIP will appear on screen. If you selected to create a new ZIP file no files will appear on screen, anyway, click on the Add files button and a dialog will appear on screen. After doing so you may select on the left part of the dialog the files you want to Add to the previously selected; ZIP, or even better you can drag and drop any file from the File Manager or the Windows 95 Explorer, doing so you can sort files by time, size or date. If you choose to add a whole directory please note that the selected directory will be recursed and every subdirectory and every file in this subdirectories will be added. If you choose to save dirnames, the directory names will be added to the ZIP. This option makes the creation of complex ZIPs a snap. After having selected every file you want to add, click on Add to ZIP and the files will be added. Note that you can add any file to any new or open ZIP.

### **To Remove files from a ZIP:**

1.-Assuming that you have opened a ZIP: Select the files you want to remove from the ZIP, you can select multiple files by pressing the Ctrl key when selecting the files. If you want to select a large group of files that are continuously arranged on the list of files compressed into a ZIP click on the first file and press the Shift key and keeping Shift pressed click on the last file on the group. Once you have selected every file you want to remove from the ZIP press the Del key or select Action-Remove Files.

### **To View a File:**

1.-Assuming you have opened a ZIP. Doubleclick on the file you want to view or select it and press F9. Note that the selected file is extracted to the directory specified in the Tools-Options by "When no directory is specified extract ZIPs to (Temporal):", the specified directory usually is the temp directory and that the changes you make to the extracted file won't affect the ZIP.

### **To Make a Self Extracting EXE:**

1.- Once you have opened the ZIP file and you want to convert it into an EXE just click on Actions-Make Exe File or press Ctrl-K. This will create a royalty free self-extracting ZIP for Win16, Win32 or DOS.

**To Move or Copy a ZIP File:**

1.- Once you have opened a file click on File-Copy ZIP or File-Move ZIP and there select the new directory

**To Delete a ZIP File:**

1.- Once you have opened a file click on File-Delete ZIP File

### **ADDING USERS**

You may add users by paying for a separate software package for each user you wish to add. You may also add users by purchasing a site-license, so long as the number of persons who are able to use the software at one time is not more than the number of authorized users specified in our package or license.

### **TRANSFERRING THE SOFTWARE**

You may transfer all of your rights to use the software to another person, provided that you transfer to that person all of the software, diskettes (if applicable), and documentation provided in this package (including this statement), and transfer or destroy all copies in any form. Remember, once you transfer the software, you no longer have any right to use it, and the person to whom it is transferred may use it only in accordance with the copyright law, international treaty, and this statement.

Except as provided in this statement, you may not transfer, rent, lease, lend, copy, modify, translate, sublicense, time-share, or electronically transmit or receive the software, media, or documentation.

### **NO WARRANTIES**

In any other matter the software is distributed "as is" with no other warranty expressed or implied, and the author in no event will be liable for direct, indirect or incidental, or consequential damages resulting from any defect in the program.

### **Internal TextEditor (ITE)**

CCZip includes an internal text editor that allows you to make changes to files in a ZIP in one step.

#### **To Open a File:**

1.-In the main CCZip Window select the desired file and click on Actions-Edit.

#### **To Find or Replace a text string:**

1.-Once you've opened the Internal TextEditor (ITE) click on Search-Find or Search-Replace.

2.-Write the desired text string and click on Find or Replace or Replace All.

#### **To Cut or Copy a selection to the clipboard:**

1.-Select the text you desire to Copy or Cut to the clipboard

2.-Click on Edit-Copy or Edit-Cut.

#### **To Print a file:**

1.-Once you've opened the Internal TextEditor (ITE) click on Search-Find or Search-Replace.

2.-Select File-Print and the Print Dialog will appear on screen, click on OK.

Add \$2 for S/H if you want to receive an envelope with the disk.

## **CCZip the best way to Zip and UnZip files using Windows 95/NT**

### **Multiple Disk Spanning**

CCZip makes it easy to create Zip files that "span" multiple disks. This is useful if the files you are working with will not fit on one disk.

To make a Zip file that spans multiple disks, simply create a Zip file on a removable disk, then add files to the Zip as you normally would. If the disk fills during Add operation, you will be prompted for another disk. Simply insert the next disk and click the OK button.

**Important: disk spanning is not available when adding files to an existing archive; it is only available while creating a new archive. Also note that you cannot add or remove files from a Zip file that spans disks. CCZip requires pre-formatted disks (you can format disks using the Windows Explorer or File Manager)**

#### **Example:**

To zip the files in your c:\mydata folder to a Zip file called A:\MYDATA.ZIP:

- 1) Start CCZip
- 2) Click on New and create a file on A: named MYDATA.ZIP
- 3) Click the Add button
- 4) Drag and drop the c:\mydata folder from the Explorer or File Manager to the CCZip Add window
- 3) Click the OK button

If more than one disk is needed, you will be prompted for additional disks, as needed.
