## **GENERAL INTEREST**

Auspice v3.4

by Wayne K. Meyers

Do you have trouble tracking various auspicious occasions in your life? Do you forget anniversaries, birthdays and Arbor Day? Auspice pops up and gives you sufficient notice to prepare for those important dates.

Darkside Modules

by various authors

Transfix your gaze on these nine blanking modules for "After Dark" or "Dark Side of the Mac." Select from such blankers as Blur, Clouds, TerrainMaker and Wrapper.

Mac F2C v1.0

by Igor Mikolic-Torreira

This program converts FORTRAN source code to "C" source code. Just think; now you can write a program in FORTRAN, which is similar to BASIC, and then convert it to the highly universal "C" language for compiling.

MacLifeInsurance v2.0

by Adam Stein

MacLifeInsurance is an easy-to-use yet powerful package of utilities that protects your data from system crashes, accidental deletions, power outs, corrupted files and other Macintosh disasters! But it doesn't stop there. It also protects your eyes, back, and wrists from computer related injuries by advising you to take a break at specified intervals. Also included is a quick and easy utility for switching between concurrently running applications.

RubikSolver v1.0

by Steven Loh

RubikSolver simulates and solves Rubik's Cube. Some of its features are rotate, scramble, solve, 2D/3D view, change cube colors, zoom in/out, bounce, auto rotate, pretty patterns, save pattern/solution moves as text, and print. It also features an elegant interface.
