Power PC/FAT Programs and Files

Included this month are a collection of programs for the Power PC.   A Power PC will be required to run these programs.   Also included are FAT programs which contain both RISC based Power PC code and native motorola 680x0 code.   Consequently, FAT programs will run on both Power PCs and standard Macintoshes and the only drawback is that they take up a bit more space on your CD-ROM or hard disk.
