FONTS

BlackHawk font
by John Singer
This Western-style font features serifs in the middle of each character. Contains upper and lower case letters, and both TrueType and Type 1 formats are included.

ChiseledOpen font
by B. Haber
There's no limit to the utility of this flexible font. It lends an air of informality without sacrificing quality. Both TrueType and Type 1 formats are included.

Glass Tubes Four
by LetterBank
Neon tubes form the individual characters and add a high tech flair to your layouts. Great for signs and banners! Includes large and small caps, numerals and punctuation.

Harbinger
by Scriptorium Font Library
A stylish display font, Harbinger is reminiscent of psychedelic posters from the '60s. Very bold, with rounded edges and spiky serifs. Great for posters and flyers.

Printer Ornaments 1 & 2 font
by Michelle Dixon
This dingbat font is chock full of beautiful, antique, woodcut designs including a sea shell, ornamental squares, and flowered corners. Both TrueType and Type 1 formats are included.

Raj font
by Mike Zillion
The subtle textures of Sanskrit writing are captured in this enigmatic font. Slashes, swirls, and unified lines connect all the letters. Both TrueType and Type 1 formats are included.

Russian font
by John Singer
Just for Club members — a complete upper and lower case Cyrillic alphabet, complete with numbers and punctuation. Both TrueType and Type 1 formats are included.

Sanguinary
by Scriptorium Font Library
Add a little fright to your documents. These letters appear to be dripping blood!

SpaceCowboy font
by Marty Bee
SpaceCowboy is a science fiction face that would do well on Buck Rogers' helmet. Both TrueType and Type 1 formats are included.

PROGRAMS

ChooseUser v1.2.1
by Flux Software
Network administrators love this Control Panel! Control and set up access privileges for any Mac. Change the owner, either manually or automatically, at startup. Take control!

Colortime v2.0
by Patrick Sirr
Do you love color? Then Colortime is for you! This great little paint program comes with everything you need to create colorful scenes and layouts! Not only do you get a wide variety of tools and color palettes, it also comes with a great collection of PICT backgrounds and images. Select your images from these primarily outdoor scenes, add color and text! On-line help is provided and graphics may be saved as PICT images.

Dejal Text Utilities v2.0
by David Lambert
Two fantastic applications! Use TextSplitter to split text files into multiple parts and TextMerge to join several text files together according to a set of user-defined options.

Digital Filter v1.1.1
by John A. Baro
Wow! Perform Fourier analyses, digital filtering and quantization on gray-scale images! Images can be any size — its limited only by available memory and your patience. This version requires an FPU or SoftFPU on your utility disk.

EPS Fixer v1.2
by David C. Schooley
Now you don't need Adobe Illustrator to view EPS files! If your file is missing the PICT preview resource, EPS Fixer tries to add one for you. It supports Macintosh drag-and-drop and AppleScript. A great little utility!

LaserwriterLockout v1.2
by Flux Software
Lock or approve access to any Chooser on your system. Need to lock certain individuals, approve others? Let this system Extension do it for you!

Plug-in Manager v1.0
by Jonas Wallden
Enable or disable plug-in combinations for programs like Adobe Photoshop, Adobe Illustrator, Quark XPress, Aldus PageMaker, Deneba Canvas, Microsoft Word and more!

Select and save different combinations for later use.

Photoshop Tutorial #11
by Kai Krause
