## GENERAL INTEREST

Audiodeck v2.0.6
by David Lebel
Fantastic! An audio CD remote player for Apple CD-ROM drives! (Audiodeck also works with non-Apple drives which are 100% compatible with Apple's drivers.) Play inserted CDs automatically, disable or enable individual tracks in shuffle mode, and maintain an audio CD database. This FAT application runs on Power PCs as well as native 680 x 0 machines. System 7 and Color QuickDraw are required.

CatFinder v1.36
by Keith Turner
Get organized! Catalog and browse any disk with this great disk management tool! Floppies, hard disks, CD-ROMs — any disk can be cataloged with CatFinder. First, it catalogs your disks and provides an intuitive Finder like interface. Once a disk is cataloged you can quickly browse the disks contents without having the disk mounted on your desktop. Powerful search and report features help you locate and organize your files.

Dark Side of the Icon
by Dan Mikel
Twenty-four exciting new icons — serpents, ninja stars, skulls and spirits galore! Ranging from the scary to the morbid, these are sure to get noticed! These look best at 256 colors, where you can appreciate the eye-popping color.
NOTE: To use the icons simply use the COMMAND-I after you have selected an icon by clicking once. When the information box appears, select the icon in the left hand corner and hit COMMAND-C. This copies the icon to your clipboard. Repeat this process for each target application or document. To paste instead of copy, use COMMAND-V.

FloppySystem Trimmer v1.1f
by Dragonsoft
Reduce the size of files required on boot-able system disks. The benefit? You have more room for other utilities and applications. We urge you to use only copies of the relevant system files since permanent changes will be made! Never modify your original files!

TM MandelAcid v2.0
by The Bone Factory
Wow! Generate moving, swirling, kaleidoscopic effects with this   Mandelbrot sets generator. Produce mind-boggling effects like Venus Fly Trap, Bow Tie and Hypnovision. Comes with an unusual, beautifully-crafted interface you have to see to believe! Customize and manipulate your fractal graphics with its many manipulation options and ample on-line help. Surrealistic!

ZoneRanger v1.1

by Metrowerks, Inc.
Pinpoint system crashes and mysterious errors with this nifty utility. Use it to access detailed information about currently active heap zones, including free block counts and total sizes, pointers, and handles (lock, purge and resource). You can even export this information to text files.

QB Reference v1.0.1
by Ray DiBugnara
Now you can call up the proper QuickBASIC reference information on any program! This Desk Accessory is compatible with any Mac — from a Plus through a PowerPC 8100! You get everything you need on Errors, Windows, Dialog, Mouse, edit field types, Button, System, GetFontInfo, Textface, Textmode, Penmode, memory fre and full definition of variable types, limits, capacity and more!

QuickFormat! v8.0.1
by Night Light Software
Format and duplicate disks with unparalleled speed and ease of use. As you know, formatting disks on the Mac can be cumbersome. Now you can turn off the verify option and streamline the process!

QwikSHIP
by CopperHead Software
Tired of the all the preparation and paperwork involved in shipping parcels? Keep track of you shipping records, maintain an customer lists, quickly calculate shipping totals based on package weight and method of shipping — everything you need! Prints to your dot-matrix or laser printer.
NOTE: Requires a ImageWriter or other compatible dot-matrix printer for printing COD tags.

Snapz v1.0.0
Ambrosia Software, Inc.
This is the big game hunter of screen capture programs: it'll capture the wild ones for you. No image is too fast, too tricky or too large — Snapz captures them all! Grab images you could never grab before, images like start-up icons, pull-down menus, games in the thick of the action, animations, videos ... not even your screen savers are safe!

Tradex v1.0.9
by Paul J. Rodman
At last! A professional quality stock management application. This one is comparable to commercial programs. An advanced stock market technical analysis and portfolio manager, it's a sophisticated tool for evaluating stock performance. Analyze stocks against historical price and volume. Most well-accepted technical indicators are included. Apply these indicator functions in any combination. For example, you can take a 12-period moving average; a 7-period moving average of that 12-period moving average; the momentum of the 7-period moving average, etc. Play the stock market —

but play it wisely. This program is perfect for anyone with a moderate to expert level of experience.
