GENERAL INTEREST

Benchmark
by Randy Mcanally
Like a speedometer for your Mac, Benchmark tells you how quickly
your computer is processing instructions. It's quick and easy,
taking only 10 seconds, and by turning extensions off and
retesting you can determine the fastest system configuration.
You'll hav as much fun as we did running around figuring out who
has the fastest Mac!

Burn/Enigma Package
by Mike Watson
This is a fantastic data encryption and security package that will
ensure your privacy no matter who has access to your Mac! Enigma
encrypts your sensitive files so that noone else can read them
without your password. It's easy to use and comes with extensive
documentation. Burn destroys the contents of files when you
empty your trash can, ensuring that they cannot be read by
someone with an undeleting utility. Together, Burn and Enigma are
ideal for the office Mac or any computer shared by multiple users.

DiskLocker+ v1.2
by Olivier Lebra
Lock and unlock any kind of disk with this handy utility. Other
features include assigning a password to locked volumes —you
can't make changes without the password. Easy to use with
thorough documentation.

e-Catalog
by CopperHead Software
Create fantastic electronic catalogs of your products or
services — complete with pictures and text. You can even create
electronic résumés!

Flashback Demo (part 1 of 3)
by Delphine & MacPlay
As you regain consciousness, questions flood your mind. "Who am
I?" "Where am I?" "What do I do now?" Your mind responds only
with images of men chasing and shooting at you. You remember a
fiery crash and then nothing. This is Flashback. You must now
make your way to a destination unknown, with many obstacles
between you and safety. Incredibly inricate graphics and the most
realistic motion ever seen on a Mac are the hallmarks of this
incredible offering from Delphine Software and Macplay.

KeyQuencer v1.2.1
by Alessandro Levi Montalcini
This macro engine takes the form of a small system Extension and a small Control
Panel device. Install these utilities, and you can assign multiple step processes to a
single keystroke. A well documented and extremely powerful program with tons of
extras!

MicroRecorder Pro+ v2.2
by Afshin Latifi
Record sounds with your microphone-equipped Mac and store them in multiple formats
with this versatile program. Records in mono or 8-bit stereo with many recording and
editing options.

QuickLOOKups
by CopperHead Software
Quickly and easily calculate UPS shipping charges within the 48 contiguous states with
QuickLOOKups! A must-have for the home office Mac!

Quiz Me! Computers
by Iverson Software Company
Test your computer knowledge with this HyperCard stack. It covers everything from
CPU to RAM.

Revelation v2.1 and Benchmark
This month's we are featuring two programs that will help you get to know your
computer better!

Revelation v2.1
by Jim Moore
Ever wonder how much RAM your applications are actually using?
Are you tired of running out of memory while running multiple
applications? Revelation is the answer! This tiny (only 33k on
your hard disk) application uses only 80k of RAM, yet it keeps you
 abreast of the various goings on within your system. Just slip
an alias of this program in your startup items folder (within the
System Folder) and the next time you start up a small status bar
will greet you. The bar continuously displays your system's vital
statistics and an irrestible pair of cartoon eyes follow your cursor around and blink when
you type. The eyes are even functional; they move slowly
whenever an application "hogs" memory.

SuperClock
by Steve Christensen
Displays a fully configurable digital clock in the menu bar next to the balloon help icon.
This is the Control Panel that was incorporated into version 7.5 of Apple's system

software. Choose your font, color and the type of information displayed. In addition, you can choose a sound to be played as a chime.

TaxByte
by Jim Moore
Here's a quick and dirty way to figure out how much of your hard earned money the the kind folks at the IRS are entitled to. If you need a quick thumbnail sketch, for instance in tax planning, you'll find that TaxByte gives a pretty accurate estimate.

TimeClock&SignOut
by Mike Nudd - CopperHead Software
A time clock and in/out board program. Another great accessory for the office Mac!
NOTE: When prompted for a password enter "nw" (lowercase).

VendorDA
by Bill Baldridge, Four Arts+
Need to contact a vendor or service provider for Macintosh products? Chances are you'll find the phone and fax numbers in this easy to use Desk Accessory. Display or print by alphabetic letter. In color and black and white.

WrapScreen v1.4
by Eric Aubourg
Here's a simple little control panel that is surprisingly useful. Just drag this control panel into your System Folder and your cursor will magically be able to jump to the other side when you drag it off the screen. It even allows you to jump across while carrying icons!
