

## DESKTOP PUBLISHING

### Clip Art

This installment includes three black and white images and one in color. Fleur-de-lis is a stylized flower useful for anything from a dingbat to a full sized decoration. The light bulb is a shaded black and white image and the symbols include a key, a car and a no smoking sign.

This month we are featuring five color images and two black and white. Five dollar bill is an artist's conception of what the new currency may look like while African Bull Elephant is a highly stylized representation of an elephant with its trunk raised. In the spirit of Spring, we have also included three different bicycles, a stylized bicycle helmet and an America's Cup yacht.

### DOCMaker

by Green Mountain Software

DOCMaker is an excellent tool for creating stand-alone documents. Electronic newsletters, resumes, brochures — you name it. Add text, graphics, sounds, even animations. The finished product can be read and printed without any other application. Outstanding!

### Easy Envelopes+ v2.6

by Ambrosia Software

Now you can create and print envelopes quickly and easily. You can even import addresses from other programs. Like all Ambrosia programs, this one includes full documentation and online help.

### epsConverter v1.2.1

by Artemis Software

With epsConverter you can ensure that programs like Adobe Illustrator can import eps images rather than merely placing them. Then separate elements of the image can be edited and the on screen image will be true to the printed image.

### NervouzReich

by Susan Townsend

A bold and beautiful sans serif font. This font looks spattered and worn and is ideal for large stylish displays.

### PICT Scrounger v1.1

by Jim Moore

With PICT Scrounger you can scan all of your applications for PICT

resources, which you can then turn into PICT files. Great for creating customized startupscreens and icons with your favorite logos.

#### Tex-Edit Plus

by Trans-Tex Software

This feature-filled word processor leaves Simpletext and Teach Text in the dust. Simple to learn, but very powerful. You can add sounds or pictures to your documents and even open up PC or Windows text files.

#### VendorDA

by Bill Baldrige, Four Arts+

Need to contact a vendor or service provider for Macintosh products? Chances are you'll find the phone and fax numbers in this easy to use desk accessory. Display or print by alphabetic letter. In color and black and white.

## Fonts

#### Abaddon

by Dave Nalle/Scriptorium Font Library

Abaddon is a dark and mysterious sans-serif all-caps font with a very modern look. It's great for headlines or captions and looks especially good in large sizes.

#### TIFF Analyser

by Simon Wynn

Open and get information about TIFF files (Tagged Image File Format) — especially useful for TIFF files you have been unable to open.

#### Asphodel

by Dave Nalle/Scriptorium Font Library

Asphodel is a serif font with lots of calligraphic jagged lines of varying thicknesses. You'll especially enjoy the lower-case "g".

#### Castiglione Font

by Scriptorium Font Library

Castiglione is a beautiful serif font with graceful, calligraphic lines and flowing curves.

#### Diodes Font

by Michel Bujardet

This futuristic serif font looks similar to an LED display, but it deviates enough to be stylish and includes all the ASCII characters.

Type 1 format.

#### Rackham font

by Scriptorium Font Library

Squiggly and bearing some resemblance to sticks or bones, Rackham is a fun serif font suitable for fun headlines or captions.
