GAMES

Arashi v1.1
by Project Storm Team
A remake of the classic arcade game, Tempest. You are a claw, perched precariously on top of a cylinder, trying to hold back the masses of baddies climbing toward you. Numerous levels with a variety of critters. 256 colors with striking 3D graphics.

Bert v1.0a
by Ingemar Ragnemalm
Bert is an imaginative game in the genre of the classic arcade game Qbert. The protagonist (is his name Bert?) is a buck-toothed little boy with bad posture and a face like a rabbit. Kind of an unlikely hero, but that only adds to the fun. The premise is simple: Step on blocks and change their colors to green. Unfortunately, our hero isn't alone in this block world. A number of different bad guys want to do bad things to little Bert. Very bad things. Bert's 16 increasingly challenging levels, in groups of four, should keep you entertained for hours. Oh, by the way, jump poor little Bert off the edge--his scream is hilarious! **Hot tip: you can eliiminate the light blue "Mr. Potatohead-shaped" guy with the glasses. Stomp on him early or he'll change your squares back to yellow!

Bunny Killer III
By Jonathan Sweet
Speaking of bunnies, in Bunny Killer III a killer comet mutates hundreds of bunnies who then engage in a sinister plot to overrun your farm and maybe the world. Your job: take out these furry little miscreants before time runs out. You start with a measly slingshot and work your way up to a ray gun. Waste the furry little carrot-chompers and eventually you may face the head bunny himself! Incredible 8-bit stereo sound. Turn up your speakers if you have them!
**Hot tip: The documentation isn't very clear on this, but use the number keys on your keyboard to switch weapons (after   you acquire better weapons).

CardTable v2.01
by Anthony Theisen
This update of CardTable includes Black Jack. Easy to play with complete documentation including rules of play.

Danger Swamps v2.0
A simple but addictive side-scrolling game. You control a stick man as he runs, jumps

over obstacles and swings on ropes. Very amusing.

Eric's Solitaire
Sampler
by Delta Tao Software
Throw out all your other solitaire games 'cause this is the only one you'll need!
Incredible interface allows you to "throw" the cards towards their desired location.
Beautiful graphics, especially the card backs. A weasel logo on a stats window greets
you after each game and shows you how you've done. This sampler includes Klondike
and Eight-Off.

FarOut!
by Recreations Software
Five dice games in one! Rules for all five are included in the well-written help windows.
Gorgeous full-color interface is intuitive and will have you playing right away.

Flashback Demo
By Delphine & MacPlay
As you regain consciousness, questions flood your mind. "Who am
I?" "Where am I?" "What do I do now?" Your mind responds only
with images of men chasing and shooting at you. You remember a
fiery crash and then nothing. This is Flashback. You must now
make your way to a destination unknown, with many obstacles
between you and safety. Incredibly inricate graphics and the most
realistic motion ever seen on a Mac are the hallmarks of this
incredible offering from Delphine Software and Macplay.

Laser Lab
By Jonathan Sweet
Welcome to Laser Lab. Your assignment, should you decide to
accept it, is to direct a laser through cancerous tumors and back
to the collector. To accomplish this you strategically place
various mirrors, then stand back and hope for the best. This logic
game, by the author of Bunny Killer III, is definitely worth the
disk space. **Hot tip: by clicking on a previously-placed mirror,
you can replace it with the current mirror. This message will
self-destruct in 30 seconds...

Jigsaw-It!
by Dynaware USA, Inc.
A compelling jigsaw puzzle program. Includes the ability to rotate
puzzle pieces, a first for jigsaw puzzle games! Registration gives
you tons of different pictures — you can even use your own!

Netherworld
by Stickman Software

Welcome to the underworld. Your job is to shoot various creatures and rescue the poor unfortunate souls. Don't take too long or the head beast will come after you! Great graphics and smooth animation will keep your attention through all five levels!

Proto-Pong
by S. Sinclair
Another pong clone, but with fantastic backgrounds and graphics. This one's really tough to beat!
